

Gladstone Ports Corporation
Growth, Prosperity, Community.

POSITION VACANT
IS DATABASE DEVELOPER
VACANCY REFERENCE NUMBER – COM1540/1117

Gladstone Ports Corporation is actively seeking applications from suitably qualified and experienced candidates for the role of Information Systems (IS) Database Developer. The IS Database Developer position is responsible for providing professional Database development and support, systems services associated with the maintenance of applications and corporate data and information systems to all relevant GPC departments and users, across test, development and production IS systems. The Database Developer will also be responsible for providing business support services for Databases and Applications across all sections of the business.

Specific responsibilities include:

- Database and Application Management:
 - Ensuring all Databases are developed, operated, backed-up and managed in accordance with GPC operational requirements in Test, Development and Production environments.
 - Ensuring all Applications (as specified by the Applications Services Lead) are developed, operated, backed-up and managed in accordance with GPC operational requirements in Test, Development and Production environments.

The successful candidate will be able to demonstrate experience in the following **key selection criteria** relevant to the role:

- | | |
|---------------------------|---|
| 1. Database Development | <ul style="list-style-type: none"> • Demonstrated knowledge and experience with database and application support, and SDLC • Knowledge and experience with High Availability, clusters and failover databases • Experience with Database Design, Application Design and design layout documentation (desirable) • Experience working with change management and ITIL processes (desirable) • Ability to use Snaplogic, and other automation toolsets as required (desirable) • SCRUM/DevOps methodology (desirable) |
| 2. Information Technology | <ul style="list-style-type: none"> • Experience with Microsoft SQL 2012, 2014, 2016 products • Experience with SSRS (Reporting Services) • Experience with IIS and related technologies • Experience with SharePoint related database and application management • Proficient in the use of SQL script, Javascript, C#, Visual Studio Development and related coding languages |
| 3. Interpersonal Skills | <ul style="list-style-type: none"> • Team player with a flexible approach • Results focused • Provision of exceptional Customer Service • Excellent interpersonal skills (written & oral) with the ability to deal effectively with personnel and suppliers at all levels • Demonstrated ability to work under pressure and to meet strict deadlines within a team • Self-motivated with strong organisational skills • Enthusiasm in learning new concepts and tasks, with a view of improving skills |

Candidates should possess a Bachelor level degree in IT or a related field and be able to demonstrate experience in Database and Application IT support/development experience. Candidates will also be self-starters, problem solvers and have the ability to work within a collaborative team environment.

Failure to address the key selection criteria may result in your application being unsuccessful.

Confidential enquiries can be made by contacting the Employment Officer on (07) 4976 1686. Applications are to be received prior to **8:00am, Monday 27 November 2017**, and can be submitted via www.gpcl.com.au/careers.
