PROCESS CONTROL SUPERINTENDENT CHO1083/0617

Gladstone Ports Corporation is seeking applications from suitably qualified candidates for the role of Process Control Superintendent. This position is accountable for leading the Control Systems team in the management of the process control systems within the Cargo Handling Operations department and contributing to GPC's control systems standards, design philosophy, adoption of technology and life cycle planning of the systems.

Previous project management experience and specialised knowledge and experience in control systems are required for this role. Leadership and supervisory experience, along with demonstrated success at creating innovative solutions to complex problems will also hold the successful candidate in good stead.

The successful candidate will be able to demonstrate experience in the following **key selection criteria** relevant to the role:

1. Electrical & Control Systems	<ul style="list-style-type: none">• Specialised knowledge and experience in control and electrical systems and IT networks.• Ability to apply the appropriate tools, systems and methodology within the role environment.• Practical experience in bulk handling or mining industry equipment.• Significant knowledge and understanding of the development and management of modern PLC and SCADA systems.
2. Leadership	<ul style="list-style-type: none">• Strong leadership qualities as evidenced by the ability to build trust, focus on results, coach and develop others and role model commitment to GPC's vision, mission and values.
3. Contractor Management	<ul style="list-style-type: none">• Understands contractor requirements.• Monitors contractor service delivery and works to ensure contractual agreements are met.• Works directly with contractor or contracting company to make amendments as required.
4. Cost Monitoring and Reporting	<ul style="list-style-type: none">• Broad knowledge of cost monitoring and reporting and understands the importance of these in meeting project outcomes.• Applies a broad understanding of organisational, port and plant cost requirements and expectations.• Monitors, analyses and reports on internal costs as required.

Formal qualifications in Electrical/Control System Engineering or similar discipline is required for this position. The successful candidate will be a problem-solver, and be self-motivated.

Failure to provide a written response to the key selection criteria listed above, will result in your application being unsuccessful.

Confidential enquiries may be made by contacting the Employment Officer on (07) 4976 1686. Applications are to be received prior to **4:00pm, Friday 23 June 2017** and can be submitted via www.gpcl.com.au/careers.
