

## **Clearer view for Agnes beachgoers**

**27 April 2017**

Beachgoers can now see the condition of Agnes Water beach a little clearer with the installation of new camera.

The old camera was recently replaced with a HD 720p camera, providing viewers with a higher resolution and faster experience.

The Agnes Water beach webcam is the most popular of the three webcams GPC streams, which include Tannum Sands and Kelly's Beach.

The webcams allow beachgoers to view the conditions of the beach prior to their visit and also provides valuable footage to Surf Lifesaving Queensland.

Last year the popular beach webcams were made in to an app, GPC Beach Webcams, compatible with iOS and Android devices.

To view the conditions, or to feel as though you're sitting on the beach rather than behind a desk, visit [www.gpcl.com.au](http://www.gpcl.com.au) or download GPC Beach Webcams on your iOS and Android devices.
